

Refrigerators and freezers

Future-proof investment with AHT systems

For decades now, AHT Cooling Systems has been an experienced know-how, product and service provider for leading supermarket chains and discounters all over the world. With the ready-to-connect AHT refrigerator and freezer systems, you can increase your sales and reduce your running costs.

BLOCK INSTALLATION

MONTREAL XL & MONTREAL SLIM

XL VOLUME

MONTREAL XL offers 20 % more interior volume than our MONTREAL SLIM model. In practical terms, this means that three frozen pizzas fit one behind the other in our refrigerator and freezer.

LARGEST DISPLAY AREA

MONTREAL XL and MONTREAL SLIM seamlessly combine attractive visual merchandising with excellent access to produce, thanks to the large glass side panels.

DESIGN

The most attractive design on the market. Linear, contemporary design with the largest display area of all AHT refrigerators and freezers. MONTREAL XL and MONTREAL SLIM can be integrated seamlessly into your store concept. The colours and surfaces are adapted individually to your requirements.

BLOCK INSTALLATION

SYDNEY XL

EXTRA DEPTH AND LENGTH

Thanks to the dimensions of the SYDNEY XL, this refrigerator and freezer unit provides maximum space for your products. For example, three pizzas fit one behind the other in this unit.

OPTIMUM PRODUCT VISIBILITY

The stylish glass side and front panels provide an excellent view of the unit interior. Together with the bright LED interior lighting, they enable perfect presentation of frozen goods.

ATHEN XL

ENERGY EFFICIENCY & TOTAL COST OF OWNERSHIP

ATHEN XL is a double world champion with the lowest power consumption and lowest total cost of ownership (TCO) on the global market.

LARGEST CAPACITY

ATHEN XL provides the largest capacity of all AHT refrigerators and freezers for your products. With up to 1071 litres, three pizzas fit one behind the other, for example, in the ATHEN XL 250.

BLOCK INSTALLATION

BLOCK INSTALLATION

MIAMI

PERFECT PRODUCT PRESENTATION

The large, deeply curved, forward-facing, panoramic sliding glass covers optimise the merchandise presentation area and visibility of the unit interior. It also impresses with its low height and easy removal of the goods on display.

SMALLER SIZE

Thanks to its compact dimensions, MIAMI is ideal for convenience stores, filling stations and other smaller spaces.

BLOCK INSTALLATION

PARIS

MOST RELIABLE REFRIGERATION UNIT

PARIS is an enduring bestseller – with more than 200,000 units sold and lowest service rates, PARIS is the most reliable refrigeration unit on the market.

OPTIMISED SIZE AND VISIBILITY

Thanks to its low depth, PARIS is particularly suitable for convenience stores and smaller spaces. The panoramic sliding glass covers provide a particularly good view of the produce.

IN-LINE UNIT

MANHATTAN

MAXIMUM EASE OF USE

The four glass sliding doors allow MANHATTAN to be opened from every side. You can easily attach price displays to the central divider.

MAXIMUM SIZE

With a net volume of 814 litres, MANHATTAN 210 provides plenty of space for your products. In practical terms, this means that you can accommodate three frozen pizzas, one behind the other.

STANDALONE UNIT

MALTA

INDEPENDENT POSITIONING

MALTA can be accessed from both sides. It is ideal for smaller retail spaces, because it can also be used as a standalone solution for narrower aisles.

MACAO

ACCESSIBILITY

Thanks to its pedestal, MACAO is easy to access from all four sides. The customer can stand close to the unit and reach all the products comfortably.

DISPLAY AREA

With its four glass sides and sliding glass cover, MACAO guarantees best-possible visibility of produce for your customers.

STANDALONE UNIT

STANDALONE UNIT

IBIZA

PERFECT PRODUCT PRESENTATION

The large panoramic sliding glass lids and the four-sided glazing optimize the product visibility. In addition, Ibiza scores thanks to its low height and easy product removal.

ACCESSIBILITY

IBIZA is accessible from all four sides and the removal of goods for customers is easy.
